### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. This application has been examined. Claim 1 is pending in this application.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over applicant admitted prior art (specification page 1 and figs. 1-2) in view of Tsai (6,219,252).

The admitted prior art discloses the invention as claimed except for the inclined sides to connect with another inclined sides of another connecting plate. Tsai, however, discloses such a pair of inclined sides 511 for engaging with inclined faces 61,62 (col. 2, lines 35-45). Therefore, it would have been obvious to one skilled artisan at the time the invention was made to include the teaching of Tsai in the applicant admitted art in order to ensure latching function.

Further, it would have been obvious to modify Applicant's admitted prior art by having the sides with different type of configurations since applicants have presented no explanation that these particular configurations of the side are significant or are anything more than one of numerous configurations a person of ordinary skill in the art would find obvious for the purpose of providing latching effect between connecting plates. A change in shape is generally recognized as being within the level of ordinary skill in the art. In re Dailey, 149 USPQ 47 (CCPA 1976).
